

Our Chlorella Powder is of *chlorella vulgaris* variety.

It is grown in man-made pond in the Island in South China Sea, China. This island is far away from mainland China. This island is a tourist attraction

The water for growing Chlorella is fresh water drawn from underground

The manufacturer uses organic fertilizer for growing Chlorella. The main ingredients of our organic fertilizer are rapeseed meal and castorseed meal. The organic fertilizer do not contain stools from human or animals.”

Our Chlorella Powder is NOT Raw, because it is spray dried.
